

Comparing IBS calculation with measurements

Tom Mertens
(John Jowett)

IBS Calculation

- Varying
 - RF voltage
 - Transverse Emittance
 - Longitudinal Emittance
- Interpolating functions for the growth times

Measured Data

- 3 Fills (1366,1375,1400)
- Bunch by bunch data (intensity , luminosity and bunch length)
- Smoothing the data by moving average
- Interpolating functions for the data (as a function of time)
 - Bunch length -> longitudinal emittance + growth time
 - Intensity and luminosity -> transverse emittance + growth time

Fill 1366: Bunch length

Fill 1366: Longitudinal

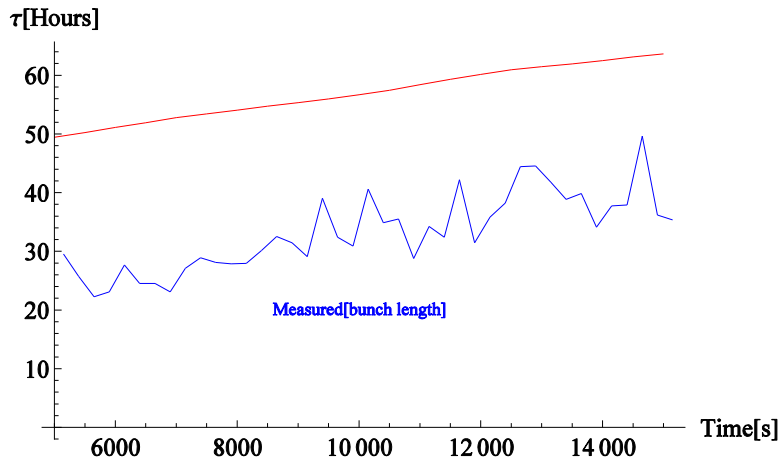

Fill 1366 Bunch 1

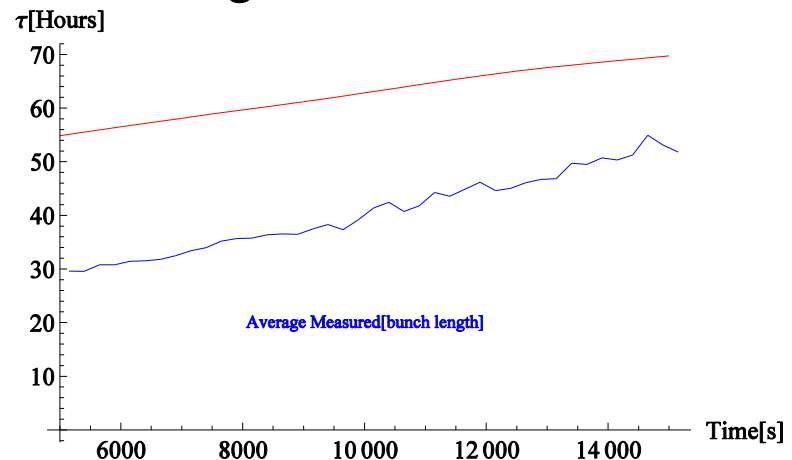

Fill 1366 Bunch 15

Fill 1366 Bunch 17

Average over all bunches

Fill 1366 : Intensity

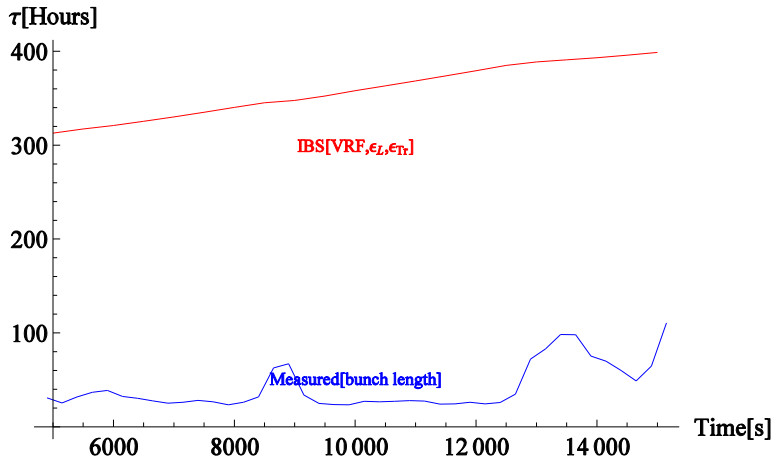

Fill 1366: luminosity

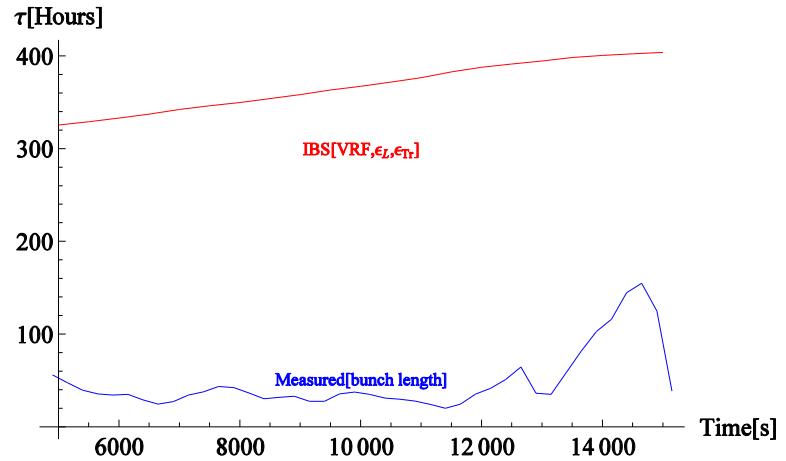

Fill 1366: Transverse

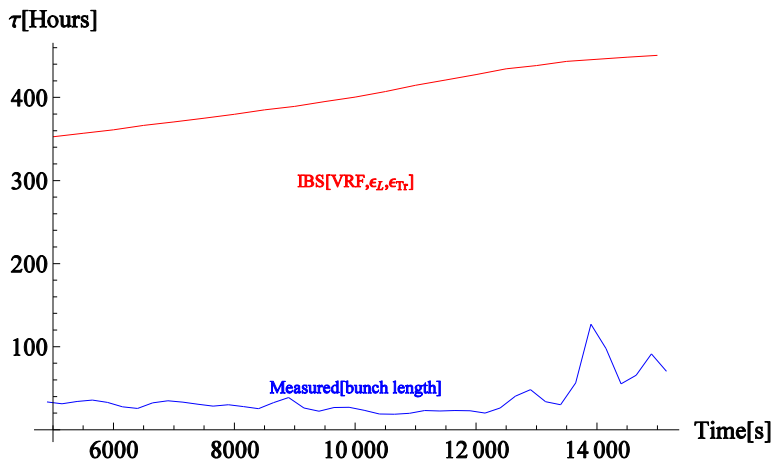

Fill 1366 Bunch 1

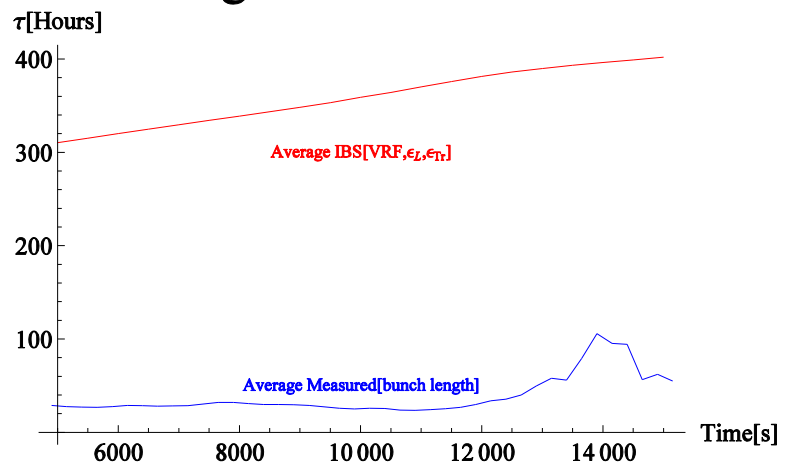

Fill 1366 Bunch 5

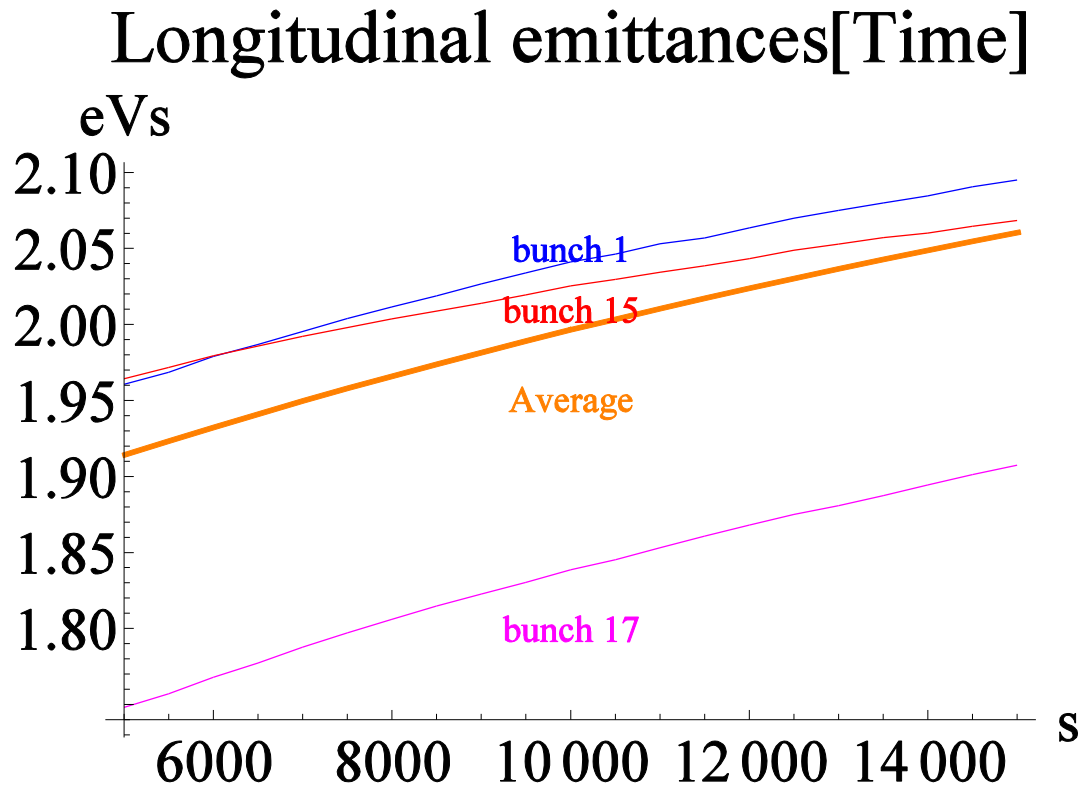

Fill 1366 Bunch 15

Average over all bunches

Fill 1366 : longitudinal emittance

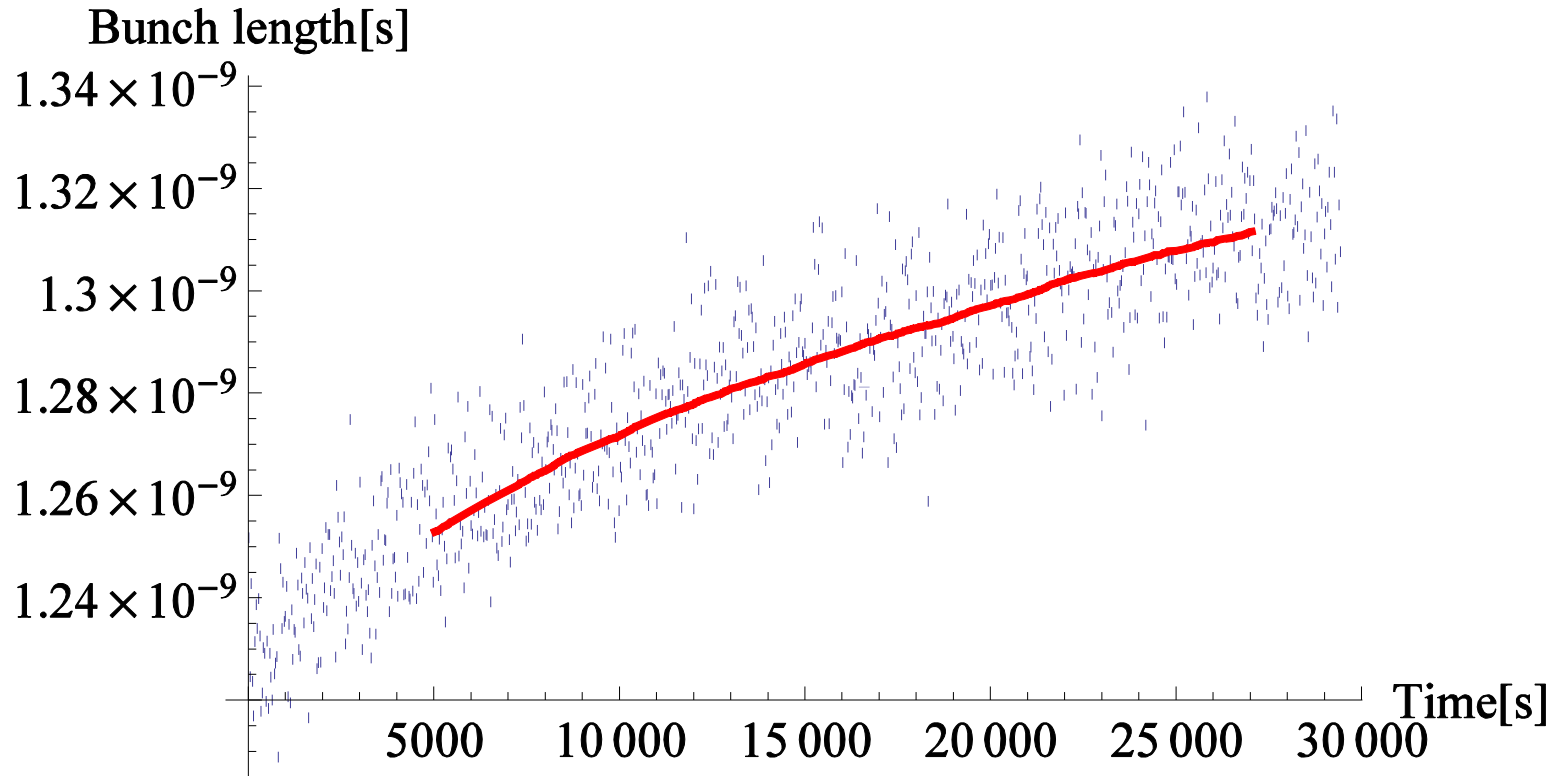

Fill 1366: transverse emittance

Transverse emittances[Time]

Fill 1375: Bunch length

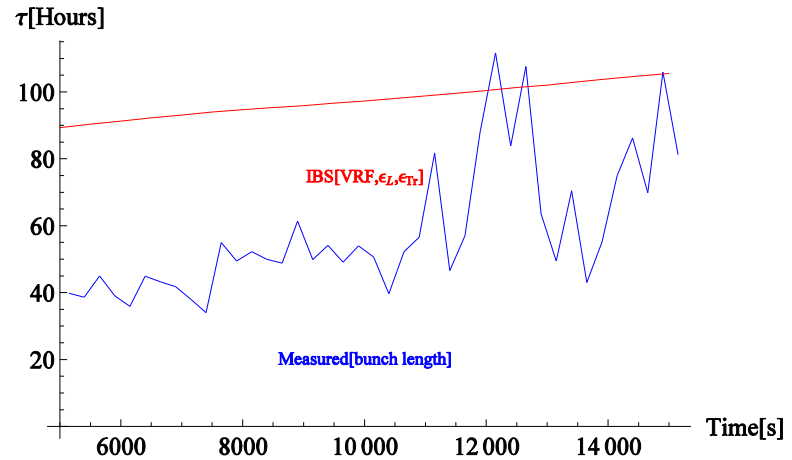

Fill 1375: Longitudinal

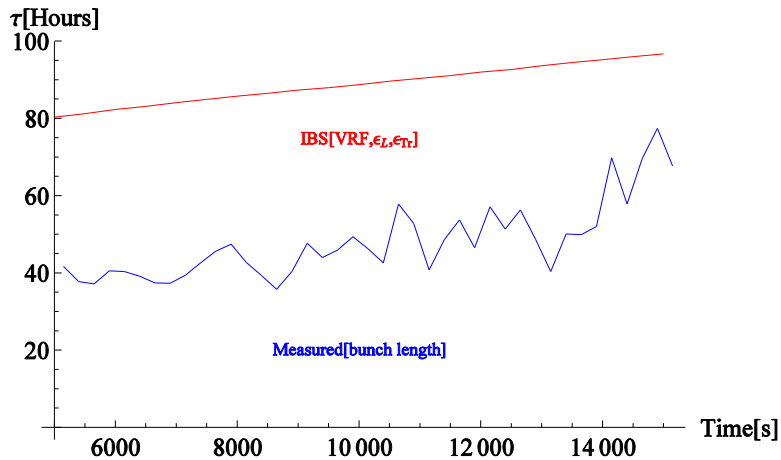

Fill 1375 Bunch 1

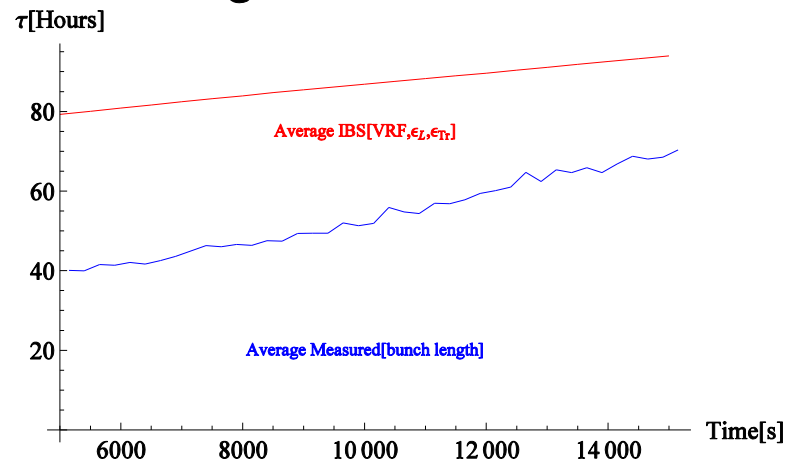

Fill 1375 Bunch 15

Fill 1375 Bunch 17

Average over all bunches

Fill 1375: Intensity

Fill 1375: luminosity

Fill 1375: Transverse

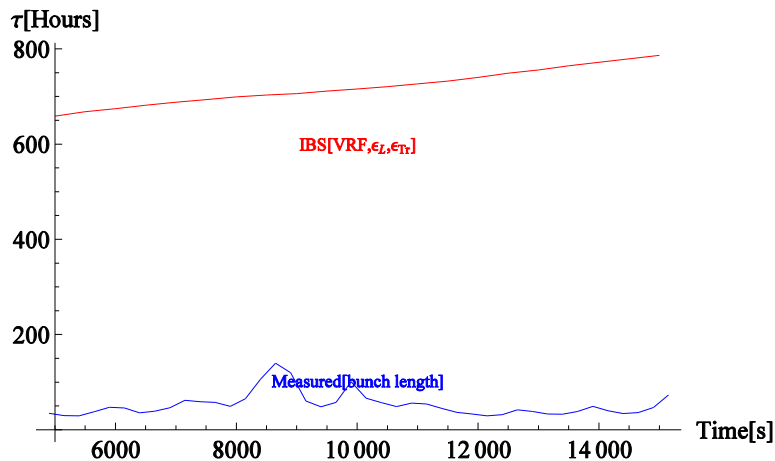

Fill 1375 Bunch 1

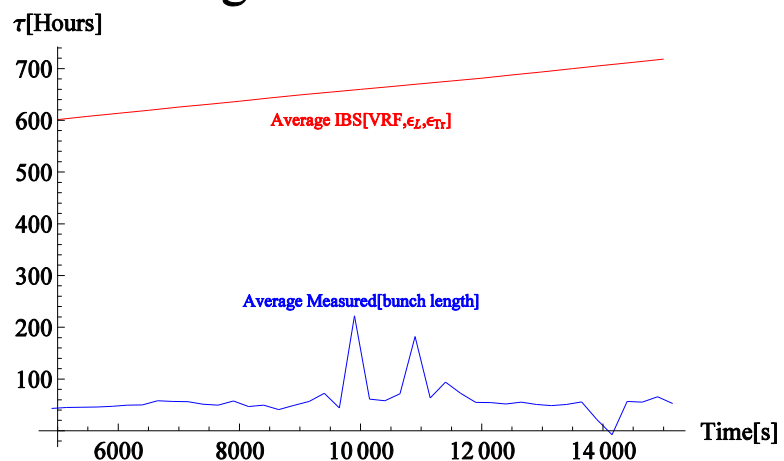

Fill 1375 Bunch 5

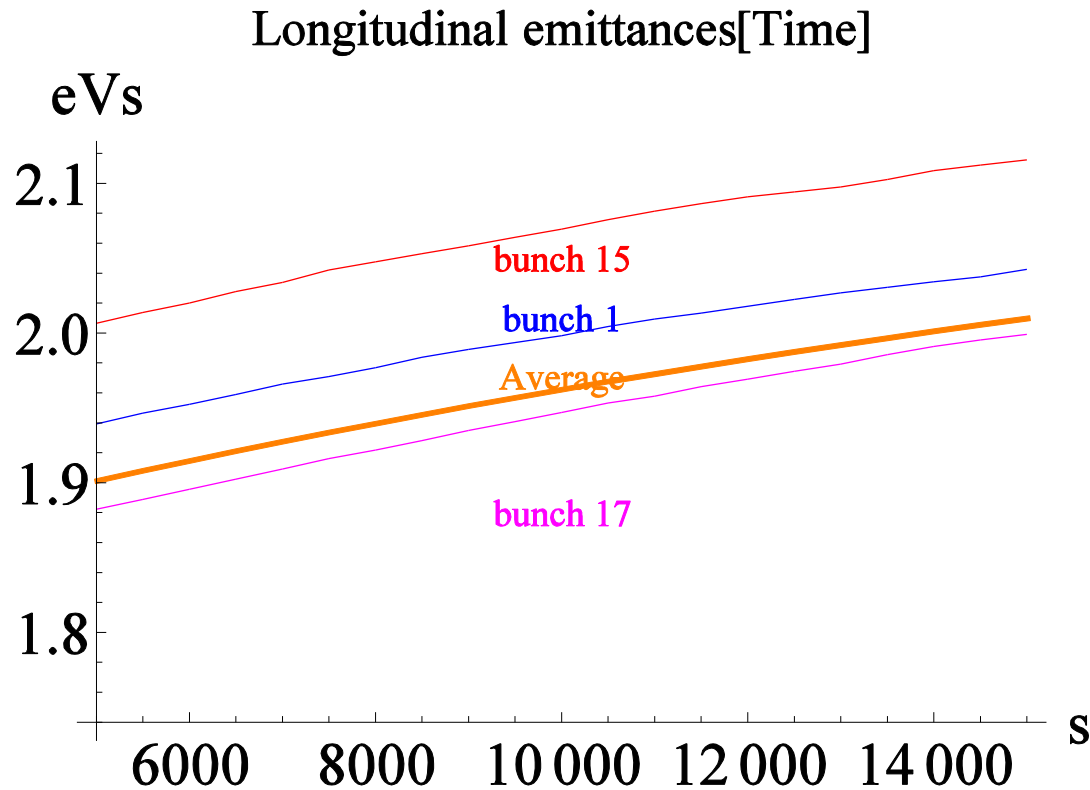

Fill 1375 Bunch 15

Average over all bunches

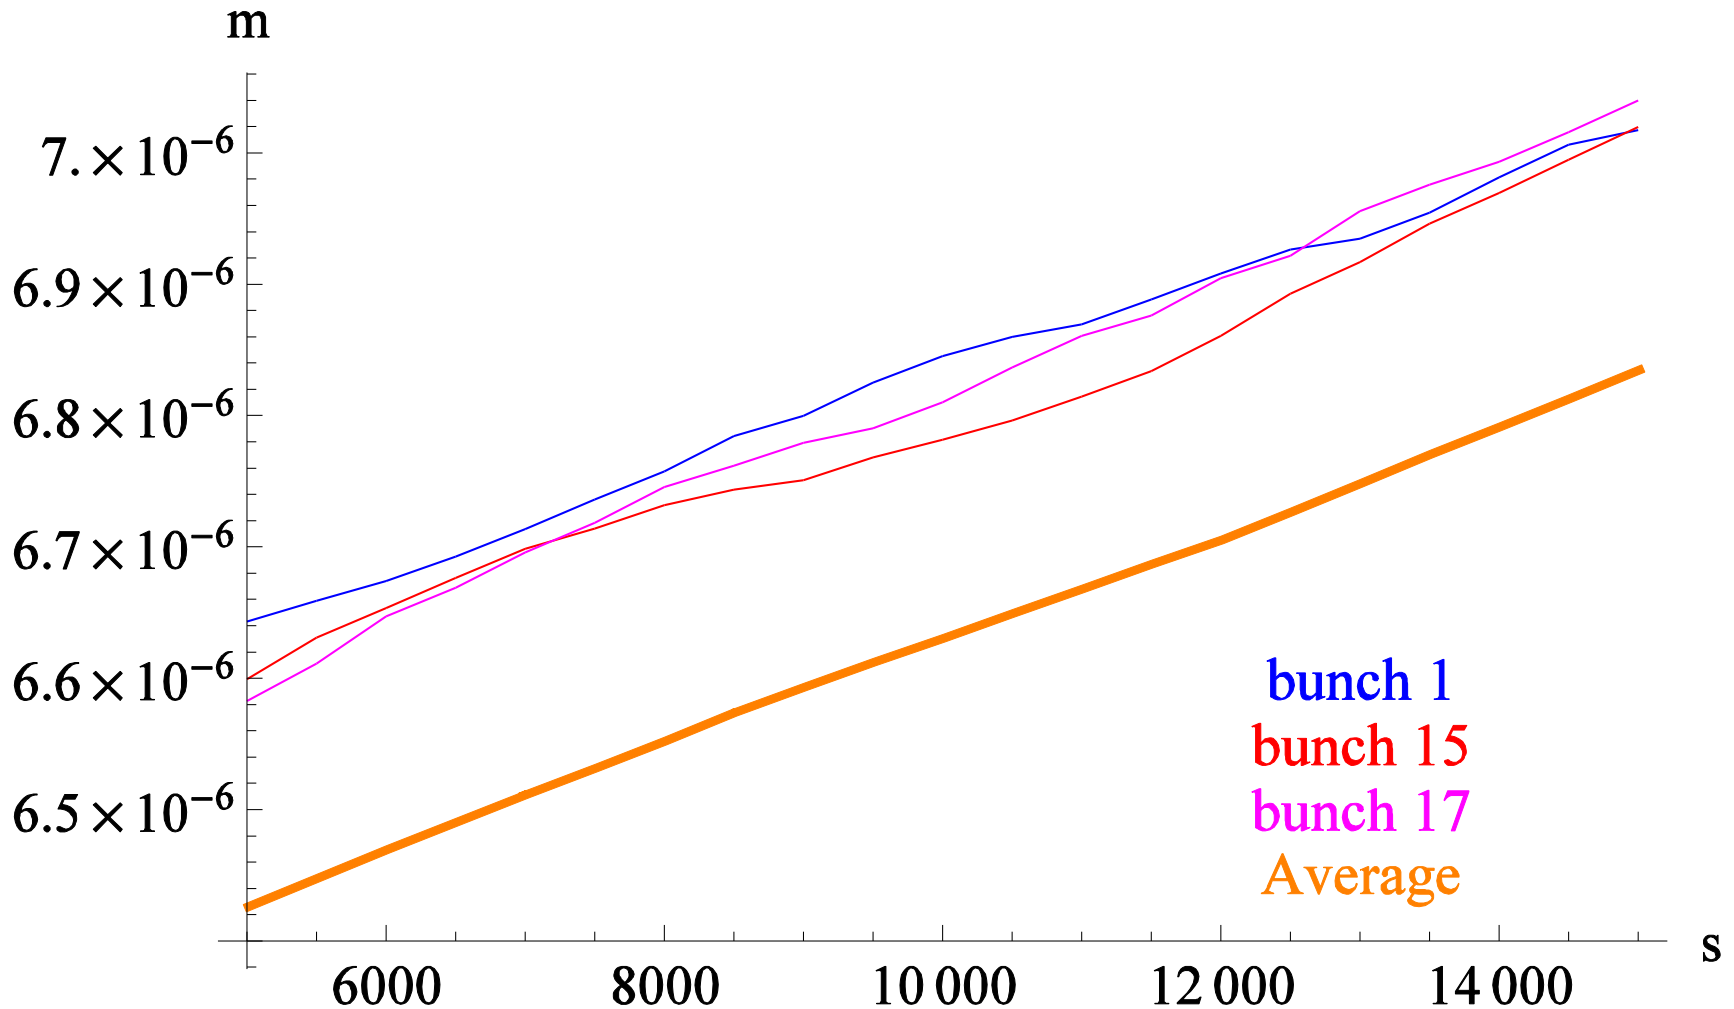

Fill 1375: longitudinal emittance

Fill 1375: transverse emittance

Transverse emittances[Time]

Fill 1400: Bunch length

Fill 1400: Longitudinal

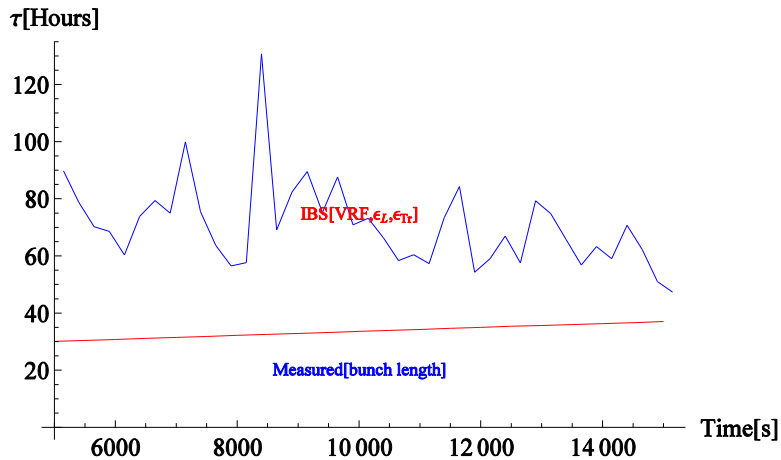

Fill 1400 Bunch 1

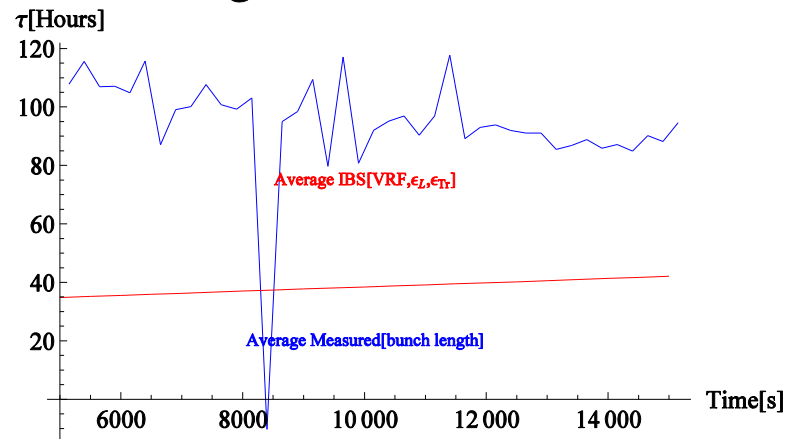

Fill 1400 Bunch 14

Fill 1400 Bunch 17

Average over all bunches

Fill 1400: Intensity

Fill 1400: luminosity

Fill 1400: Transverse

Fill 1400 Bunch 1

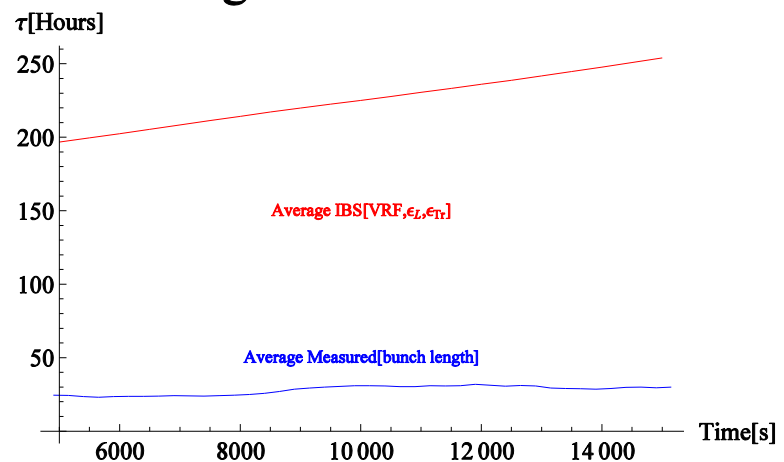

Fill 1400 Bunch 5

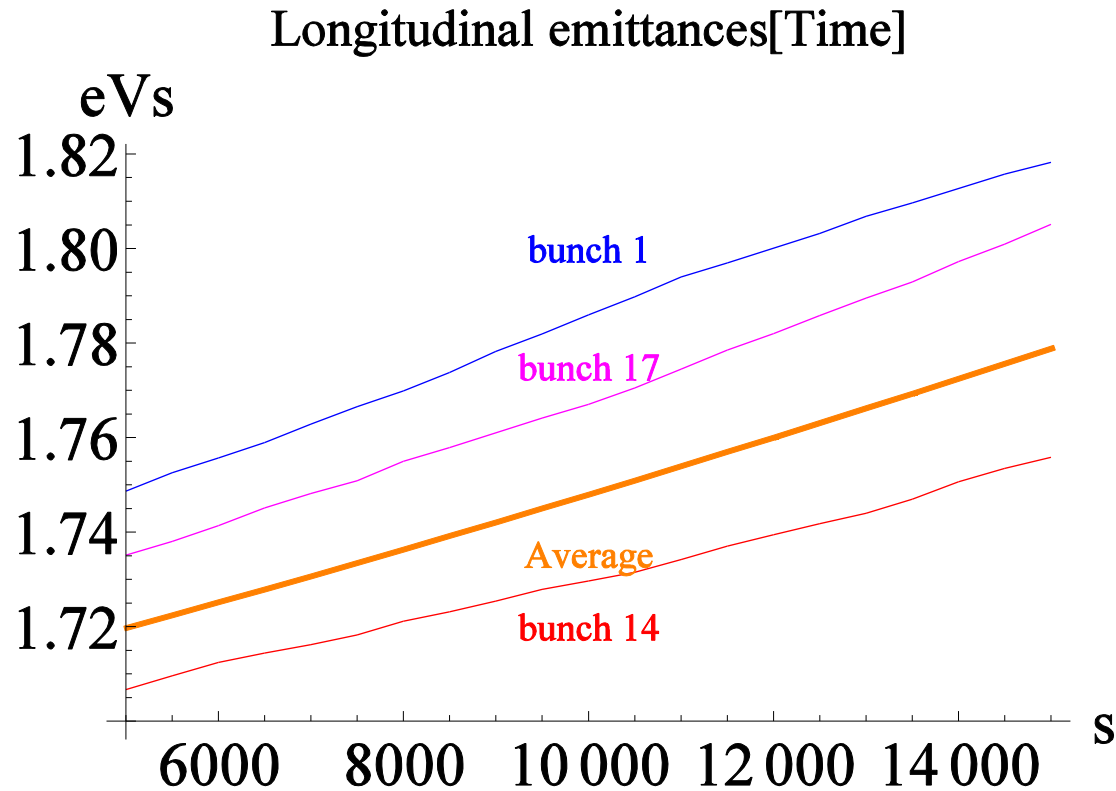

Fill 1400 Bunch 14

Average over all bunches

Fill 1400: longitudinal emittance

Fill 1400: transverse emittance

Transverse emittances[Time]
